## TRANSCASTLE 4050 AIR B

- Semi-Automatic thermotransfer machine (operating with air pressure)
- The membrane inflates, it evens out raised surfaces, allowing transfers to be applied alongside linings, heavy seams, buttons, zippers, topstitched pockets and more
- Electronically temperature adjustment of great accuracy, for stable plate temperature from 0 - 250°C.
- Air pressure 0,5 Bar.
- Electronic adjustment of time 1- 999"
- Useful surface: 38 x 48cm
- Power: 3KW.
- Voltage: 230V 50Hz
- Indispensable supplying of pressured air.
- Works with compressors 25 – 50Lt
